- Indus Books Agency (100+ titles)
- Springer eBooks (200+ titles)

**Economic Importance of Igneous Rocks**

- Igneous rocks have been made from the solidification of magma which is very rich in mineral content. Therefore igneous rocks have a large variety of minerals in bulk. Most of minerals of the world are found in igneous rocks.
- Economically important minerals are iron, nickel, copper, lead, manganese, cobalt and tungsten like gold, diamond and platinum. Granite is a strong beautiful and colored stone obtained from the igneous rocks. It is used for as a building material.
